•• Hard to solve

Fail

⊙ ⊙ ⊙ Low impact

••• Easy to solve

FYI

Title

Cape Henry Associates, Inc.

000 *****

Length: 27 character(s)

Great, your title contains between 10 and 70 characters.

Make sure your title is explicit and contains your most important keywords.

Be sure that each page has a unique title.

Description

Missing

000 **

Your meta description should contain between 70 and 160 characters (spaces included).

Meta descriptions allow you to influence how your web pages are described and displayed in search results. A good description acts as a potential organic advertisement and encourages the viewer to click through to your site.

Ensure that your meta description is explicit and contains your most important keywords. Also, each page should have a unique meta description relevant to the content of that page.

Headings

000 ***

H1	H2	Н3	H4	H5
0	0	1	0	0

<H3> Latest News

Great, your website is structured using HTML headings (<H1> to <H6>).

Use your keywords in the headings and make sure the first level (<H1>) includes your most important keywords. Never duplicate your title tag content in your header tag.

For more effective SEO, use only one <H1> tag per page.

Keywords Cloud

This Keyword Cloud provides an idea of your most frequently recurring keywords. They are likely to be the keywords with the greatest probability of ranking high in the search engines.

Images

We found 6 images on this web page.

000 ***

No alt attributes are empty or missing.

Good, most or all of your images have alternative text (the alt attribute).

Alternative text describes your images so they can appear in $\mathsf{Google}^{\scriptscriptstyle\mathsf{TM}}$ Images search results.

Great, this page's ratio of text to HTML code is higher than 15 percent.

Although your text to code ratio is good, you can always improve it by adding more text content to your pages.

A ratio between 25 and 70 percent is ideal. When it goes beyond that, the page might run the risk of being considered spam.

As long as the content is relevant and gives essential information, it is a plus to have more of it.

Indexed Pages

88

000 **

This is the number of pages on your website that are indexed by search engines. The more pages that are indexed, the better, as this offers more opportunity for your website to be found.

A low number (relative to the total number of pages/URLs on your website) probably indicates that your internal link architecture needs improvement and is preventing search engines from crawling all of the pages on your website. You might want to create/check your site's XML sitemap and submit it to the major search engines. You must also build backlinks to your site's internal pages to help search bots crawl and index your web pages.

Check Google™ Webmaster Tools under Health and Index Status, to keep track of the status of your site's indexed pages.

Google+ Publisher

Missing

000 ***

Your website is missing a rel="Publisher" link to your Google+ Page. This type of authorship markup is great for your brand. It ensures that your company is featured in SERPs, as opposed to only individual authors as is common with rel="Author".

In-Page Links

We found a total of 15 link(s) including 0 link(s) to files

000 **\$**\$\$

External Links: NoFollow (0%)
External Links: Follow (3.6%)
Internal Links (96.4%)

Anchor	Туре	Follow
http://cape-henry.com/images/cha.ico	Internal Links	Follow
http://cape-henry.com/style.css	Internal Links	Follow
Home	Internal Links	Follow
SDVOSB	Internal Links	Follow
Services	Internal Links	Follow
SeaPort-e	Internal Links	Follow

Limit the number of links to 200 per page. Use Nofollow to optimize the juice that you want to pass to each link.

Broken Links

No broken links were found on this web page

000 ***

Congrats, your web page does not contain any broken internal links.

Broken links send users to non-existing web pages. They are bad for your site's usability, reputation and SEO. If you find broken links in the future, take the time to replace or remove each one.

Backlinks Counter

000 ***

Backlinks are links that point to your website from other websites. They are like letters of recommendation for your site.

Since this factor is crucial to SEO, you should have a strategy to improve the quantity and quality of backlinks.

WWW Resolve

Be careful. Your website without www doesn't redirect to www (or the opposite). It is duplicate content!

000 ###

Be sure that www.cape-henry.com and cape-henry.com are not running in parallel.

Redirecting requests from a non-preferred hostname is important because search engines consider URLs with and without "www" as two different websites.

Once your preferred domain is set, use a 301 redirect for all traffic to your non-preferred domain.

IP Canonicalization

Yes

000 ***

Good, your website's IP address is forwarding to your website's domain name.

To check this for your website, enter your IP address in the browser and see if your site loads with the IP address. Ideally, the IP should redirect to your website's URL or to a page from your website hosting provider.

If it does not redirect, you should do an htaccess 301 redirect to make sure the IP does not get indexed.

Robots.txt

http://www.cape-henry.com/robots.txt

000 ***

Great, your website has a robots.txt file.

A robots.txt file allows you to restrict the access of search engine robots that crawl the web and it can prevent these robots from accessing specific directories and pages. It also specifies where the XML sitemap file is located.

Click here to check your robots.txt file for syntax errors.

XML Sitemap

Missing

000 ******

Your website does not have an XML sitemap - this can be problematic.

A sitemap lists URLs that are available for crawling and can include additional information like your site's latest updates, frequency of changes and importance of the URLs. This allows search engines to crawl the site more intelligently.

We recommend that you generate an XML sitemap for your website and submit it to both Google $^{\text{TM}}$ Webmaster Tools and Bing Webmaster Tools. It is also good practice to specify your sitemap's location in your robots.txt file.

URL Rewrite

Perfect, your URLs look clean.

000 ***

Great! You have clean (user-friendly) URLs which do not contain query strings. Clean URLs are not only SEO-friendly but are also important for usability.

Underscores in the URLs

000 **

http://cape-henry.com/site map.html

We have detected underscores (these_are_underscores) in this URL and/or in your in-page URLs. You should rather use hyphens (these-are-hyphens) to optimize your SEO.

While Google™ treats hyphens as word separators, it does not treat underscores as word separators.

Blocking Factors

√ Flash: No

000 **

√ Frames: No.

Flash should only be used for specific enhancements. Although Flash content often looks nicer, it cannot be properly indexed by search engines. Avoid full Flash websites to maximize SEO. This advice also applies to AJAX.

Frames can cause problems on your web page because search engines will not crawl or index the content within them. Avoid frames whenever possible and use a NoFrames tag if you must use them.

Domain Registration

√ Created 11 years ago

000

✓ Expires in 6 years

Domain age matters to a certain extent and newer domains generally struggle to get indexed and rank high in search results for their first few months (depending on other associated ranking factors). Consider buying a second-hand domain name.

Do you know that you can register your domain for up to 10 years? By doing so, you will show the world that you are serious about your business.

PageRank

PR:

Blog

000 ******

We have not found a Blog on this website.

Your website does not have a blog.

In this tough and competitive internet marketing world content marketing rules. While publishing your content on other sites might be a good strategy, publishing it on your own site garners more benefits.

Starting a blog is a great way to boost your SEO and attract qualified visitors.

Use these great tips to boost the SEO performance of your blog.

Related Websites

URL	Pages	Backlinks	PR	Score
http://intellectechs.com	1k	124k	-	60.8
http://cdicorp.com	540	33k	-	67.7
http://powerhouseplanning.com	260	27	-	-
http://runninginpink.com	3k	1k	-	-

This lists the websites related to your domain. Some may be competitors while others may be websites with related content.

You may be able to use this information to see how your competitors are doing.

Resource: Use tools to learn more about your competitors' web marketing strategies.

Mobile

Mobile Rendering

000

The number of people using the Mobile Web is huge; over 75 percent of consumers have access to smartphones. Your website should look nice on the most popular mobile devices.

Tip: Use an analytics tool to track mobile usage of your website.

Mobile Load Time

Very Fast

000

Try to load your website on a mobile device and measure the download time. If your website takes more than five seconds to download on a mobile device, you will lose 74 percent of your audience!

Mobile usage is growing fast, especially in North America, where it will soon outpace desktop browsing usage. Make sure your site loads fast and that it looks nice on all types of mobile devices. Be sure to not use Flash, and keep photos and videos to a minimum.

Here are two useful tips from $\mathsf{Google}^{\,{}^{\,\mathsf{TM}}}$ for optimizing your mobile site speed.

Mobile Optimization

This website is not optimized for Mobile Visitors

000 ***

x Mobile CSS x Mobile Redirection

Additional mobile optimization techniques:

× Meta Viewport Tag

× Apple Icon

√ Flash content

Make sure that your website is prepared for mobile browsing. These are the different aspects that can be optimized for mobile users:

- Mobile CSS
- Meta Viewport Tag
- Apple Icon
- Mobile Redirection
- No Flash content

URL

http://cape-henry.com

Length: 10 character(s)

Keep your URLs short and avoid long domain names when possible.

A descriptive URL is better recognized by search engines. A user should be able to look at the address bar and make an accurate guess about the content of the page before reaching it (e.g., http://www.mysite.com/en/products).

Keep in mind that URLs are also an important part of a comprehensive SEO strategy. Use clean URLs to make your site more "crawlable" by Google $^{\text{TM}}$.

Resource: Search for a good domain name. If no good names are available, consider a second hand domain. To prevent brand theft, you might consider trademarking your domain name.

Favicon

Yes

000 ***

Great, your website has a favicon. Make sure this favicon is consistent with your brand.

Resource: Check out this amazing idea for improving the user experience with a special favicon.

Custom 404 Page

Your website does not have a custom 404 Error Page.

000 **

Apparently your site does not have a 404 Error Page - this is bad in terms of usability.

Take the opportunity to provide visitors with a beautiful and helpful 404 Error Page to increase user retention.

Conversion Forms

We could not find a Conversion Form on this page.

000 **

Add a conversion form for repeat visitors. It could be used to sign up for a subscription, get an email address of a visitor or close an online sale. Converting visitors into prospects/clients is probably the most important goal for your website.

After adding a conversion form to your site, it is important that you optimize your website to boost conversions.

Place the most important content **above the fold line**.

When designing your homepage, make sure that your most important content is placed above the fold (the top section, which is visible without scrolling).

Tip: Check Google Analytics to find out what the most common screen resolutions are among your site visitors.

Page Size

5.4 KB (World Wide Web average is 320 Kb)

000

Two of the main reasons for an increase in page size are images and JavaScript files.

Page size affects the speed of your website; try to keep your page size below 300 Kb.

Tip: Use images with a small size and optimize their download with gzip.

Load Time

0.03 second(s) (166 kB/s)

000 ***

Your website is fast. Well done.

Site speed is becoming an important factor for ranking high in Google™ search results and enriching the user experience.

Resources: Check out Google™'s developer tutorials for tips on how to to make your website run faster.

Monitor your server and receive SMS alerts when your website is down with a web monitoring service.

Language

Declared: Missing

000 ***

Detected: English

You have not specified the language. Use the META Language Attribute to declare the intended language of your website.

Tips for multilingual websites:

- Define the language of the content in each page's HTML code.
- Specify the language code in the URL as well (e.g., "mywebsite.com/fr/mycontent.html").

Printability

This is a special CSS style sheet which ensures that unnecessary interface designs and images are left out when printing pages from your site, saving the user a lot of ink.

It is just another way to provide a rich user-experience.

If you do not have a print style sheet yet, set one up.

Metadata

No Metadata have been detected

000 **

Metadata is used to generateRich Snippetsin search engine results. It is a way for website owners to send structured data to search engine robots; helping them to understand your content and crate well-presented search results.

Google $^{\text{TM}}$ supports rich snippets for the following content types: Reviews, People, Products, Businesses and organizations, Recipes, Events and Music. If your website covers one of these topics, then you should use metadata to highlight your site's search results.

We suggest that you use microformats to create your Rich Snippets.

cqpe-henry.com	Available. Book it now!	~

Register the various typos of your domain to protect your brand from cybersquatters.

Email Privacy

Good, no email address has been found in plain text.

Malicious bots scrape the web in search of email addresses and plain text email addresses are more likely to be spammed.

Your IP is not Blacklisted in the Spammer Directory.

Spam Block

It is important that your SEO efforts are not tarnished by spammy activities. Take care to avoid forum and blog spam and use best practices when sharing your content.

In addition, if you send email campaigns or transactional emails, use professional email software to keep your IP clean and improve the deliverability of your emails.

Safe Browsing

Yes

000 ***

Great, your website is safe.

No evidence of phishing and/or malware has been detected.

Technologies

Server IP

68.15.148.246

Server location: ECHESAPEAKE

Your server's IP address has little impact on your SEO. Nevertheless, try to host your website on a server which is geographically close to your visitors. Search engines take the geolocation of a server into account as well as the server speed.

Use DNSstuff for comprehensive reports on your server.

Technologies

IIS Web server

🖐 jQuery JavaScript framework

Microsoft ASP.NET Web framework

🔊 Windows Server Operating system

Get to know the technologies used for your website. Some codes might slow down your website. Ask your webmaster to take a look at this.

Speed Tips

000 **

Congratulations! Your website's speed is fully optimized.

- ✓ Perfect, your server is using a caching method to speed up page display.
- ✓ Perfect, your website doesn't use nested tables.
- ✓ Perfect, your website does not use inline styles.
- ✓ Perfect, your website has few CSS files.
- ✓ Perfect, your website has few JavaScript files.
- ✓ Perfect, your website takes advantage of gzip.

Website speed has a huge effect on SEO. Speed-up your website so search engines will reward you by sending more visitors. Also, conversion rates are far higher for websites that load faster than their slower competitors.

Analytics

Google Analytics

000 *******

Web analytics let you measure visitor activity on your website. You should have at least one analytics tool installed. It is also good to install one extra tool to have a confirmation of the results.

 $\textbf{Analytics Tools:} \ \textbf{Google}^{\text{\tiny{TM}}} \ \ \textbf{Analytics,} \ \ \textbf{Quantcast}^{\text{\tiny{TM}}}, \ \textbf{SiteCatalyst}^{\text{\tiny{TM}}}, \ \textbf{Piwik}^{\text{\tiny{TM}}}, \ \textbf{chartbeat}^{\text{\tiny{TM}}}, \ \textbf{Clicky}^{\text{\tiny{TM}}}, \ \textbf{ClickTale}^{\text{\tiny{TM}}}, \ \textbf{etc.}$

W3C Validity

Invalid: 1 Errors, 0 Warning(s)

000 **

Use valid markup that contains no errors. Syntax errors can make your page difficult for search engines to index.

To find the detected errors, run the W3C validation service, or check Validator.nu to make sure you don't miss an error.

W3C is a consortium that sets web standards.

Declaring a doctype helps web browsers to render content correctly.

Encoding

UTF-8

000 ***

Great, language/character encoding is specified.

 $Specifying \ language/character\ encoding\ can\ prevent\ problems\ with\ the\ rendering\ of\ special\ characters.$

Directory Browsing

No

000 **

Great! Your server prevents visitors from browsing your directory by accessing it directly, this is excellent from a security standpoint.

Server Signature

No

000 *****

Good, your server signature is off. This is excellent from a security standpoint.

Social shareability

000 ***

This website is not popular on Social Platforms.

🖒 Facebook Likes	3
------------------	---

The impact of social media is huge for certain industries, take advantage of this digital version of word-of-mouth marketing.

Make sure you have opened social media profiles on Facebook, Twitter, LinkedIn, Google+ and other sites that are of interest to your customers.

Learn how to engage your social media audiences and create a consistent fan base. You can also use your website to increase your popularity on social platforms.

Check these helpful tools for managing your social media campaign.

Note: This data represents social media influences from your website's URL, it does not represent data from specific brand pages.

Local

Local Directories

This is a list of the local directories where your business has been found. Take care of your listings in local directories; since maps are now an integral part of search results, your G+ Local page may have more visitors than your website!

It is important to make sure that your business details are correct in each directory where you are listed. Find the directories in your country (USA, UK, Spain, France, Canada, Australia, Brazil, and India) and enhance your listings with pictures, video, schedules and as many customer reviews as possible.

Traffic Estimations

Very Low

000

We use multiple tools to estimate web traffic, including $Google^{\mathsf{TM}}$ Trends and $Alexa^{\mathsf{TM}}$.

Nevertheless, your analytics will provide the most accurate traffic data.

Traffic Rank

11,445,845th most visited website in the World

A low rank means that your website gets a lot of visitors.

Your Alexa Rank is a good estimate of the worldwide traffic to your website, although it is not 100 percent accurate.

Reviewing the most visited websites by country can give you valuable insights.

Quantcast provides similar services.

Adwords Traffic

0%

This is an estimation of the traffic that is being bought through AdWords™ vs. unpaid Organic Traffic.

This data is provided by $SEMRush^{TM}$.
